

CATERING ORDERS & ACCOUNT BILLING

Catering and house accounts, handled in the POS.

Account-based billing and invoicing for your corporate and catering customers, built into the same system you run every day. Your regulars run a charge account, you track what they owe, and you settle on an invoice cycle instead of collecting at every order.

The screenshot shows the 'Empower Catering' interface. At the top is a navigation bar with links: Empower Catering, Calendar, Quotes (active), Order, House Accounts, Aging, Settings, and Today. A '+ New event' button is on the right. Below the navigation bar is a section titled 'Quotes' with the instruction 'Select an event to create or manage its catering quote.' A list of quotes is displayed, each with an event name, date and time, status, and a 'Manage quote' button.

Event Name	Date & Time	Status	Action
Smith Wedding 100	Tue, Jul 7, 2026 · 11:00 PM — 2:00 AM	CONFIRMED	Manage quote →
Jones Birthday	Sat, Jul 18, 2026 · 12:00 PM — 5:00 PM	CONFIRMED	Manage quote →

Every event and quote in one place, with house accounts, orders, and aging built in.

📅 One set of books

House accounts and invoicing live with the rest of your business, not in a separate ledger.

💰 No more shoebox tabs

A running account that invoices on a schedule, tracked where your sales and customers already are.

📦 All in one system

Billing, customers, and orders run on the same platform as the rest of Empower, not a bolt-on.

Catering and charge accounts, run inside your POS.

Empower keeps event catering and account billing in the same system that runs your floor. Book and quote catering from one calendar, let your corporate and catering regulars run a house account, and settle on an invoice cycle instead of collecting at every order. Accounts pull from the customer records you already keep, so billing and customer data stay in one place. No separate tools, no second ledger.

Built into Genius POS, not a bolt-on.

Catering

POS-INTEGRATED

Book, quote, and bill events from the POS.

Catering quotes and events

Build and manage a quote for each event from one calendar, confirmed or tentative, so nothing slips between the booking and the plate.

Quotes become orders

Turn a confirmed event into an order the kitchen and floor can run, off the same record you quoted.

Collect payment by paylink*

Send a secure payment link so catering and event customers can pay their quote or invoice electronically.

* Requires a payment gateway, available at an additional fee.

House Accounts

POS-INTEGRATED

Charge accounts and invoicing, built in.

Account-based billing

Corporate and catering regulars run a house account and are billed on a cycle, not order by order.

Invoicing built in

Track charges to an account and settle on an invoice schedule, without exporting to a separate billing tool.

Aging and receivables

See what each account owes and how long it has been outstanding, so you collect on time instead of chasing it later.

❑ One set of books

House accounts and invoicing live with the rest of your business, not in a separate ledger someone reconciles by hand.

\$ Get paid on a cycle

A running tab that invoices on a schedule, tracked where your sales and customers already are.

✓ Booked to billed, in one place

Quote the event, run the order, bill the account, all off the same record on the same platform.

Catering and house accounts, handled in the POS.
