

FRONT-OF-HOUSE, ON ONE SCREEN

Keep the floor **moving**.

Seat guests, run the waitlist, and turn tables without the backup at the door. Empower Host puts the whole front of house on one screen, so the host stand always knows what is open, what is coming, and who is waiting.

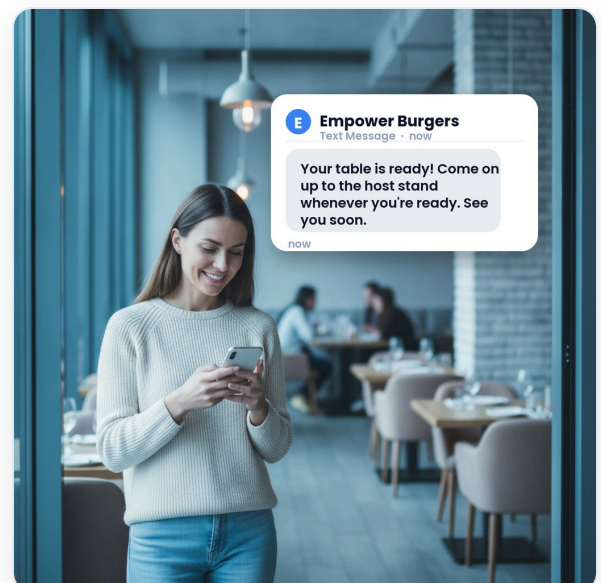

Live floor view — every table, open, seated, or about to turn, plus the waitlist on the right.

Waitlist with table-ready texts

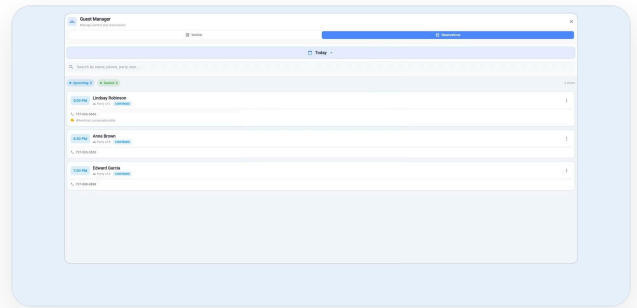

Add a party, quote the wait, and text the guest the moment their table is ready, right from the host stand. Guests can text back, so nobody wanders off and loses their place.

- ✓ Quote an accurate wait based on today's pace
- ✓ One tap sends the "your table is ready" text
- ✓ Two-way replies come straight back to the stand

Everything the door needs, in one place.

Empower Host runs on the same platform as your Genius POS, so the seat at the door connects straight through to the order, the kitchen, and the check. Reservations and the waitlist live together in one clean view. Here is everything it does:

The whole day's reservations in one clean view.

-  **Two-way Genius integration**
Talks both directions with your Genius for Restaurants POS (formerly Heartland Restaurant).
-  **Web-enabled waitlist & reservations**
Guests join the waitlist or book a table online.
-  **Two-way guest texting**
Text a guest their table is ready and let them text back.
-  **Live wait quotes**
Today's average wait, from today's actual pace, not a guess.
-  **Max party-size settings**
Set the largest party each seating can take.
-  **Reservation slip printing**
Print a reservation slip at the host stand.
-  **Automated digital menu for viewing**
Generate a guest-viewable digital menu automatically.
-  **Automatic table status from the POS**
Tables update themselves as checks open, fire, and close.
-  **AI-enabled web chat**
Answers guest menu and reservation questions on the spot, so the host fields fewer calls.
-  **Reservation reminders**
Automatic reminder texts mean fewer no-shows.
-  **Overbooking protection**
Guardrails keep the book from stacking past capacity.
-  **Server seating load balance**
See each server's table load before seating the next party, so sections stay even.
-  **KPI dashboard**
The day's key numbers at a glance.
-  **Runs on PC, tablet, or phone**
Use it on whatever hardware the stand already has.

✔ More turns, less wait

Faster, more even seating fits more covers into the same shift, without rushing guests or adding staff.

✔ A calmer door

The rush stops feeling chaotic at the host stand, so your first impression holds up when it counts most.

✔ Fewer mistakes

No double-seated tables, skipped reservations, or parties lost in the shuffle, even when the floor is slammed.

Keep the floor moving.
