

DIGITAL MENUS & SIGNAGE, ON EVERY SCREEN

Change your menu in seconds.

Bright digital menus and signage you control from one place. Edit a price, swap an item, or 86 a dish in the POS, and every screen follows within minutes. No reprints, no reboots, no waiting on a sign company.

Digital menu board, styled to your concept.

Guest-facing digital menu, live from the POS.

Live inventory and stock reporting, with on-hand counts, value, and margin.

More than signage. Digital menus, QR, and inventory, all from the POS.

- ✓ Menu boards, QR table menus, and tablet menus, all driven from the POS
- ✓ Change a price or 86 an item once, and every screen follows in minutes
- ✓ Wine and bottle inventory reporting, with live on-hand counts and value

MORE OF WHAT EMPOWER MENU DOES

Every screen, always current.

Empower Menu runs on the same platform as your Genius POS, so the menu your guests see and the items your team rings up stay in step. Boards pull items, prices, and images straight from the POS on the schedule you set. Here is everything it does:

Boards styled to the concept, driven live from the POS.

Update once, live everywhere

Edit a price, item, or photo in the POS and every connected screen follows within minutes.

Images, GIFs, and video

Drop your own images and GIFs on any board, or play YouTube and Vimeo right on screen.

One source, every screen

QR table menus, tablet menus, counter and drive-thru signage, and wine and beer lists all pull from the same POS data.

QR menu on the guest's phone

Guests scan a code to pull up your current menu on their own device.

Know what your inventory is worth

Every item carries cost, retail, and margin, totaled to the money sitting on your shelves.

Bright, readable screens

Clean digital menus that look sharp and read easily across the room.

Dayparts on a schedule

Breakfast, lunch, dinner, and promos rotate on their own at set times.

AI-assisted setup

Our AI lays out your boards from your POS menu during onboarding, and can enrich touches like wine and beverage descriptions.

Wine and bottle inventory

Live on-hand counts from the POS with history, snapshots, and CSV export. Low and out items flag on their own.

Themes for any concept

Start from a built-in theme or your own look, so the board fits the room.

No more outdated menus

Prices and items stay current because changing them takes seconds, not a reprint cycle. What the guest sees matches what you sell.

Sell what you want to sell

Feature the high-margin item, push the special, and move the slow mover by editing a screen instead of printing a sign.

Looks the part

Sharp, current screens make the whole operation feel dialed in, the first thing a guest notices before they order.

Change your menu in seconds.

empowerpos.com/menu

Empower Menu works with the Genius for Restaurants POS you already run.
