

LIVE SALES FROM ANYWHERE

Your numbers, wherever you are.

Check sales live from your phone, on iOS or Android, no terminal required. The Empower Dashboard puts the day's numbers in your pocket. Open the app and see how the shift is going at a glance, whether you are on the floor, in the office, or off site entirely.

Live net sales, labor detail, and voids. The real app, in your pocket, on iPhone or Android.

🕒 Know now, not tomorrow

A live dashboard means you act on the shift while it is still happening, not read about it the next morning.

📍 Stay close without being on site

The day comes to you, so being away from the floor does not mean being in the dark.

🛡️ One source of truth

The dashboard reads from the same system that runs your floor, so the numbers reflect what actually happened.

MORE OF WHAT EMPOWER DASHBOARD DOES

The whole operation, live in your pocket.

The Empower Dashboard reads from the same platform that runs your floor, your kitchen, and your payments, so what you see on your phone is the real picture, live. See how every location is tracking, drill into the number behind any figure, and act on the shift while it is still yours to change.

One system, not five.

The day's numbers, wherever the day takes you.

Live KPIs across every location

See today's sales and how each shift is tracking in real time, across every location you own, in one view, with live drill-downs into the numbers behind each figure.

Filter to what you need

Date-range and daypart filters, plus role-based views, so each person sees the read that fits their job.

One source of truth

The dashboard reads from the same platform that runs your floor, your kitchen, and your payments, so the numbers reflect what actually happened.

In your pocket, on any phone

A native app for iOS and Android, so you do not have to be at the terminal to know how the day is going.

See what is behind every number

Go past the top line into the detail: discounts, voids, labor, and your top items by sales, so a number that looks off tells you why on the spot.

Scan and you are in

Scan the code to download on iPhone or Android and see your numbers live, right from your phone, no terminal required.

🕒 Act while it still counts

When the read is live, you can move on the shift that is happening, not the one that already ended.

✍️ The floor, from anywhere

On the line, in the office, or off site, the same live picture is in your hand.

✓ Numbers you can trust

It reads from the system that runs your floor, so there is one set of numbers, not a second app guessing.

Your numbers, wherever you are.

empowerpos.com/mobile

The Empower Dashboard works with the Genius for Restaurants POS you already run.

 empower ×  genius

EMPOWER × GENIUS
