

CLEAR REPORTING ON SALES AND OPERATIONS

Know your numbers before the day is done.

Reporting built around what you want to see. Insight turns what is happening across your operation into numbers you can actually use. Pick the report you need, have it land in your inbox on a schedule, and look up a check when you need the detail.

Your day's numbers at a glance on the reporting dashboard, and live in your pocket on the Empower Dashboard app.

Over 60 ready-made reports

Sales, labor, product mix, audit, and more, sorted into categories so the report you need is easy to find.

Delivered on a schedule

Daily summaries, weekly P and Ls, and monthly rollups land in your inbox on their own, no one pulling them by hand.

Look up a check

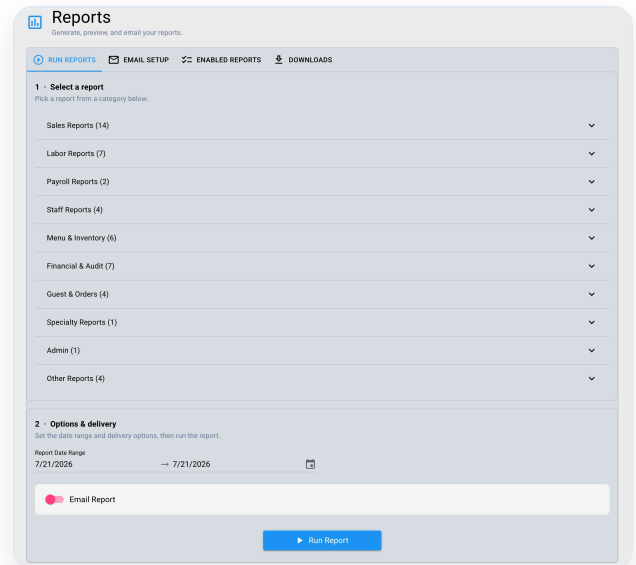

Pull up the checks from any day and search by item name to see the detail behind a sale.

MORE OF WHAT EMPOWER INSIGHT DOES

Reporting that is ready before you are.

Insight reads from the same platform that runs your floor, your kitchen, and your payments, so the numbers reflect what actually happened, not a separate system trying to keep up. Pick from over 60 stock reports, then have them delivered on a schedule. Here is what it does:

One system, not five.

Pick a report from any category, set the dates, and run it or email it.

Over 60 ready-made reports

Sales, labor, product mix, audit, and more, sorted into categories so the report you need is easy to find.

Scheduled, emailed delivery

Daily summaries, weekly P and Ls, monthly rollups, and payroll-week recaps land in your inbox. Key reports also export to PDF or CSV.

Check Viewer

Look up the checks from any day and search by item name to see the detail behind a sale.

Payroll-ready export

Insight pulls labor hours and tip totals and hands them off payroll-ready, so you are not re-keying numbers into a separate payroll tool.

Live dashboard on your phone

The Empower Dashboard app puts live net sales, labor, guest count, and voids on your phone, on iOS and Android, with no terminal needed.

Trends and analytics

See sales, labor, and cost trends over time, compare periods, and spot what is moving so you act on the pattern, not just today's number.

Audit and loss-prevention reports

Voids, comps, discounts, refunds, manager overrides, and cash-handling exceptions, surfaced so you can scan them in a couple of minutes.

Multi-location views

Run more than one site? Switch between your locations, and key reports can combine all of them into one view.

One source of truth

Every number comes from the same platform your team is already working on, whether you run one location or many.

Today's numbers, not last month's

When the report is ready before the day closes, you act on it now instead of finding out too late.

The report comes to you

Scheduled and emailed means the numbers show up on their own, with no one pulling them by hand every morning.

Act while it still counts

Clear reporting on what actually happened, in time to do something about it before the shift or the week is gone.

Know your numbers before the day is done.
