

TIP POOLING & DISTRIBUTION

Tip pooling **done right.**

Tip Pool calculates pools and distributions for you, and it does the one thing the old way cannot. When a clock-in is wrong or a tip got keyed to the wrong shift, you reopen the closed day, fix it, and regenerate the split. No starting over in a spreadsheet.

Shift Correction

Reopen a prior business day, fix a punch, and see the tip & pay impact — every change is logged.

The Junction Grille

1. Reopen a prior business day

Business day
7/20/2026

REOPEN DAY

Quick pick: Yesterday 2 days ago 3 days ago 1 week ago

This day's pay period ☒ Current period — fix the punch directly ☐ Closed / already paid — carry the change forward to the next payroll run

2. Punches for Mon, Jul 20, 2026

EXPORT
ADD MISSED PUNCH

Staff	Job	Clock in	Clock out	Hours	Tips	Actions
Jordan Mitchell	Resetter	5:04 PM	5:11 PM	0.12	\$0.00	\$
Marcus Webb	AM PREP	5:46 AM	2:00 PM	8.23	\$0.00	\$
Taylor Brooks	Host	4:34 PM	9:02 PM	4.47	\$0.00	\$
Casey Thompson	PM LINE	2:34 PM	9:28 PM	6.90	\$0.00	\$
Riley Anderson	Server	4:03 PM	10:28 PM	6.42	\$187.40	\$
Alex Turner	Manager	10:03 PM	10:03 PM	24.00	\$0.00	\$
Sam Whitfield	Kitchen Manager	7:06 PM	7:06 PM	24.00	\$0.00	\$

Reopen a closed day, fix the punch, and regenerate the split. Every change is logged.

✓ No more tip-night math

The split runs off the numbers the system already has, so no one is doing it by hand at close.

🔄 Fix it without starting over

A late correction is a reopen and regenerate, not a rebuilt spreadsheet, so the final numbers are right and defensible.

🛡️ One set of numbers everyone trusts

When the tip ledger is the record of truth, there is no arguing two versions of the math.

MORE OF WHAT EMPOWER TIP POOL DOES

The tip pool that lets you fix it after close.

Tip Pool works off the same platform that records your sales, so tips split off what actually happened on the floor, and corrections live in the same place. No exporting, no second spreadsheet, no arguing over which version of the math is right.

One system, not five.

Tips split off the shift your team actually worked.

Pools and splits automatically

Tip pools and distributions calculate on their own off the day's numbers, so no one is doing it by hand at close.

One authoritative tip ledger

Tip Pool becomes the record of truth for tips, so the payout numbers actually match what happened on the floor.

Works with your payroll

Fix a punch in the current period directly, or carry a change in a closed, already-paid period forward to the next payroll run, so a late fix still lands in the right check.

Fix a day after it closes

Reopen a prior shift, correct a clock-in, a wrong job code, or a credit-card tip error, and regenerate the distribution. That gap is exactly what sends operators back to spreadsheets on other systems.

Every change is logged

Reopen a day, fix a punch, and see the tip and pay impact right away, with every change logged for a clean, defensible trail.

Built on your live sales

Tips split off the same platform that records your sales and hours, so the numbers reflect the real shift, not a separate system trying to keep up.

⌚ Take tip night off your plate

The math runs itself at close, so the manager is not sitting with a calculator after the last table leaves.

🔄 A mistake is not a redo

Reopen, correct, regenerate. The one thing spreadsheets cannot do is the thing that saves the night.

🛡️ Numbers you can defend

One tip ledger, every change logged, so payouts match what happened and there is nothing to argue about.

Take tip night off your plate with Tip Pool.
